[What Tools Are Used in Archaeological Digs? | Career Trend](#)

Archaeologists are scientists that study how humans lived in the past. They do this by excavating the remains of past human societies. Artifacts such as cups and bowls used for eating, tools employed in everyday activities, and the dwellings they lived in all provide clues for the archaeologist to analyze.

Sea otters use tools, too. Now scientists look at their ...  
Archaeologists can tell a lot by looking through prehistoric trash. Piles of chipped stones and broken shells, crushed by hungry humans long ago, can reveal where we lived, how we lived, and for

#### New Philadelphia Archaeological Project

For archaeology, the trowel is probably the most iconic and most-often used tool. It is the same tool that masons use to apply mortar to brick walls, though in archaeology it is used to excavate in a unit when the space no longer allows for the use of a shovel. There is a long-standing (but usually good-natured) debate in the archaeology community about whether a pointed or square-ended trowel
